Petrochemicals Sustainability Conference

**KUALA LUMPUR CONVENTION CENTRE
26-27 SEPTEMBER 2024**

FUTURE READY PETROCHEMICALS

The Petrochemicals Sustainability Conference (PSC) 2024, organized by the Malaysian Petrochemicals Associations (MPA) and Informa Markets Malaysia, returns alongside Oil & Gas Asia (OGA) 2024 after a successful debut in 2022. This biennial conference, hosted by MPA, aims to drive knowledge sharing among industry leaders, focusing on the challenges and pathways to a low carbon future and green technology across the supply chain.

With support from knowledge partners Boston Consulting Group (BCG) and Environmental Resource Management (ERM), PSC 2024 prioritizes discussions on climate-related topics and facilitates conversations on how the regional petrochemical industry can contribute to global net-zero ambitions.

Recognizing ongoing challenges in sustainability, MPA provides guidance to companies on their journey towards a more resilient and environmentally conscious future. PSC serves as a vital platform for regular engagement with stakeholders, enabling knowledge exchange, collaboration, and the identification of shared goals. Through innovation, partnerships, and addressing climate-related issues, PSC 2024 is set to play a crucial role in shaping a resilient and sustainable future for the region's petrochemical sector and beyond.

KEY THEMES

Decarbonisation of Operations

Circular Economy Practices

Resilience and Profitability
